

**Build connections with staff, customers, the world**

## **Secure, Dynamic Web Publishing Helps You:**

- ▶ **Provide platform-independent archive access**
- ▶ **Enhance service and save staff hours**
- ▶ **Integrate document access with your existing Web site**

## Easy Access to Your Archives

As more and more people turn to the Web for information, you want to provide the documents they need. They need fast access to your office's documents, and you need a little more freedom. How will you make your vast document archives available online quickly and effortlessly?

The answer is Laserfiche WebLink. Now when people need to reference documents in your archives, they can look them up with their Web browser instantly and independently while you attend to other things.

Once they have found a document, users can download and print a high-quality PDF file.

## Dynamic Web Publishing

Scanned and archived documents appear instantly on the Web without the need for time-consuming file conversions or HTML programming. The electronic courier takes on the role of publisher and dynamically transforms document pages into Web pages. You can match the look and feel of your existing site by customizing Laserfiche WebLink. The graphics, fonts, buttons, wallpaper and text can all be easily modified to meet your design criteria.

## A Proven Solution

What makes Laserfiche WebLink a universal solution is its availability. It is designed to accommodate any browser. Any authorized person can view documents without needing extra plug-ins, the latest equipment, or the fastest Internet connections. Laserfiche WebLink makes your documents available to any Web-connected Mac, PC or workstation. Once you remove the obstacles from your documents, the possibilities are endless.

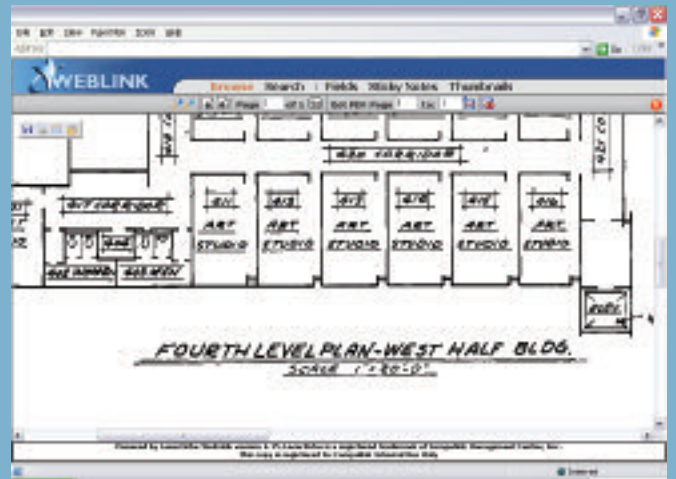

## An Integral Part of a Complete Laserfiche Solution

Once your office's documents have been scanned or imported into the Laserfiche document management system, your work is practically done. Laserfiche makes it easy to store and organize huge volumes of documents. The simple-to-set-up folder structure can be modeled on your existing filing system. This finger-tip organization refines the way you manage your records.

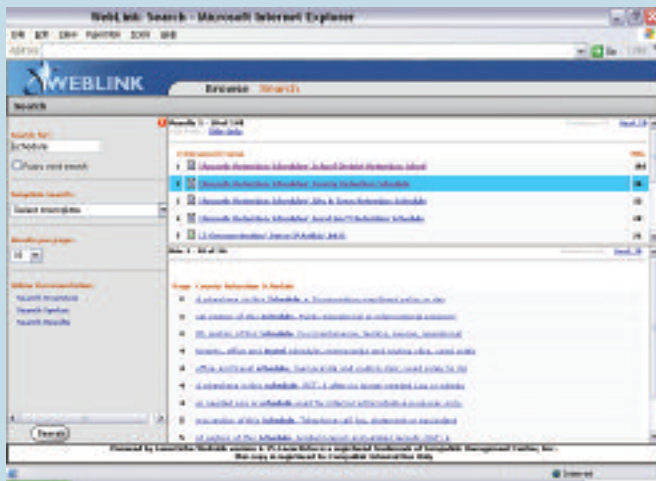

## On Your Way with WebLink

Acting as an electronic courier between the Laserfiche document management system and any Web browser, Laserfiche WebLink delivers actual images and PDF files. Anyone can view the image, text, or template of a document. To balance the trade-off between high-resolution images and fast file transport, Laserfiche WebLink initially sends an oversized thumbnail image so that the reader can read the document quickly. More detailed images and PDF files then can be retrieved with the click of a button.

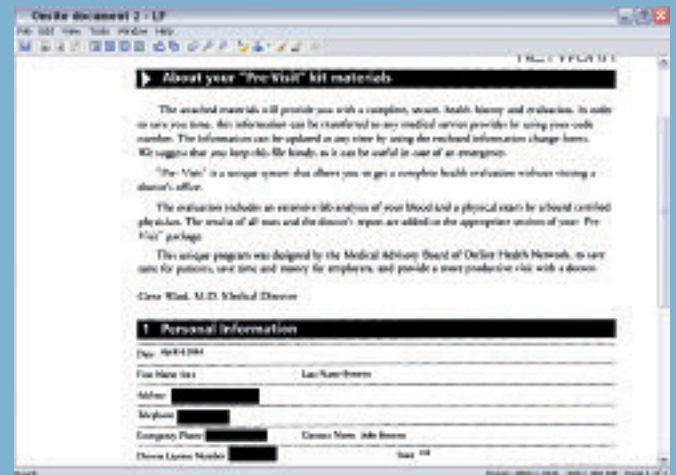

## Instant Search and Retrieval

With Laserfiche WebLink, your users search for documents themselves using our award-winning search engine. They can view and print the results – saving you and your staff countless hours. They can also browse through folders and select documents by name. Or, they can perform full-text searches to locate the exact document immediately. Fuzzy logic, Boolean and even template field searches help pinpoint hard-to-find information. Lines of context display how the word or phrase is used before the entire image is retrieved.

## Balancing Security and Access

The security of your archives is never in question. Laserfiche's security methods pass the stringent requirements of many government clients. You decide what folders and documents can be viewed via the Internet or your intranet. You can even redact portions of your document for additional security. Because Laserfiche WebLink translates document pages into Web pages, the public never comes in direct contact with the original files. There is no way for the public to modify text or images. This additional level of security gives extra peace of mind.

# About Laserfiche

## Laserfiche Product Suite

### Laserfiche Document Management Platform
